Department of Botany

Report On Tutorial Classes

2016-2017

Tutorial classes are conducted in our department for students to assist them to achieve expected competencies in core academic skills in the subject. The overall attendance of students was 91 % for academic year 2016-2017.

Summary of these classes organized by Department of Botany is as follows-

Program type: Tutorial Classes

Schedule: December to February

Class: B.Sc. I, II and III

Venue: Class Room, Botany Lab, Seminar Hall 2 and 3.

No. of Students Registered: 90

Name of Faculty: Asst. Prof./HOD SangeetaYadav, Asst. Prof. Sharda Singh

Tutorials are small group setting and students meet to discuss and clarify important points arising from the lecture, or from readings for the month. Tutorials and seminars require students to demonstrate their self-directed learning.

The aims of the tutorial are to:

- Provide learning experiences
- Allow you to explore and clarify a topic by asking questions and trying out ideas
- Encourage development of active listening and speaking skills.

Participation in tutorials can help to develop independent thinking; the ability to argue, defend and support a case; the ability to present a viewpoint concisely and selectively; and the ability to discriminate between opinion and evidence.

For a tutorial to work well, students need to:

- Prepare- do the reading!
- Test out ideas
- Ask questions
- Summarise what others have said
- Listen actively and intelligently
- Encourage others to share their ideas
- Provide illustrations and examples of supporting and conflicting evidence
- Challenge ideas in appropriate ways

Speaking Effectively

Students often feel uncomfortable about speaking in tutorials. Knowing what to say, saying it correctly and having the confidence to speak up are essential aspects of effective communication. It takes courage to speak effectively in public, but the tutorial is an opportunity to develop this skill.

Students may lack confidence if they are not prepared, if they haven't understood all the material or if they feel intimidated by other students' knowledge or confidence. Here are some suggestions:

- Begin in small ways: ask a question we have already prepared, or make a point we have understood well.
- Push yourself to make a contribution in each tutorial. Prepare it beforehand.
- Asking for clarification about a key issue or point is often the most approach!

Planning A Presentation

It is common for students to lead tutorials based on the topic for the month. We will be expected to give a talk and to generate discussion.

The topic and come to terms with the main ideas.

- Begin by drawing up a rough plan of our talk.
- Read to gain an overview of our topic.
- Determine what the question is asking.
- Develop your own questions about the topic.
